HOMESCHOOLING: YOU'RE DOING IT RIGHT!

Whereas the public school system is very uniform, the landscape of homeschool includes all sorts of variety. This variety can sometimes lead to confusion about the decisions we make along our homeschooling journeys. We know that God is a lover of variety. We can see that simply by looking at His creation. He made 7,000 different types of apples, for instance. In this session you will learn how to cater learning to the individual interests of your children and you will leave embracing the freedom that homeschooling offers each family.

As the public schools continue to become less safe physically, emotionally, and spiritually, more and more parents are considering homeschooling. On a daily basis, parents around the country are wanting to bring their children home to learn, but they are often at a loss with where to begin. It can be overwhelming to start the process, but once you get going, homeschooling can be easy, refreshing, and enjoyable! Just like we often get a quick start guide to electronics, this session by Ginny Yurich, homeschooling mother of five and former public school educator, will be providing a quick start guide to starting your children on their home education. You will leave this session believing that you are the best teacher for your child!
